ACKNOWLEDGEMENTS
We would like to thank GAATW, especially Jan, Bandana and Mami and all the support staff in the Bangkok office, the three Implementing Agencies and the local women’s groups for their full co-operation and participation in this review. They accompanied us during the visits, spent time with us in meetings, made all kinds of the arrangements, shared documents and were patient and open to respond to our (for them sometimes) naive requests for information and critical detailed questions. We hope and trust that the whole review process has been a positive learning experience for all of them and that GAATW and the IAs feel we have done justice to their work.

The same words of thanks are for all the translators: Mr. Souneak Yean Mak, Ms. Doan Tam Dan and Ms. Dang Hoang Anti Thu, and the other persons and organisations who were willing to give some of their valuable time to us.

We look back at a very enriching period, in which we as an ‘outside insider’ (Siriporn) and an ‘inside outsider’ (Nelleke) have been able to take stock of a project of which we were directly or indirectly godmothers.

Last but not least, we thank the Royal Netherlands Embassy for the confidence and task entrusted to us to conduct this review. We hope they are satisfied with the result.
